*2024 new colors

This Corian® Solid Surface paper palette is a flexible, handy and lightweight tool composed of high-definition printed paper samples which give a visual impression of what Corian® Solid Surface colors look like.

All printed colors were evaluated and compared to real Corian® Solid Surface samples under a 6000k lighting source.

This operation allowed the most accurate print match with the original material.

Evaluation under different lighting conditions as well as differences in visual perception, could lead, for some colors, to appreciable differences between paper and material.

It is always advisable to evaluate the physical Corian® Solid Surface sample before making the final selection.

We invite you to visit www.corian.com, check our online color tool or ask your Corian® Solid Surface sales contact for more information.

This list is valid from May 2024, until further notice.

Aesthetic Highlights

Corian® Solid Surface aesthetics include a variety of characteristics that deserve particular attention to achieve the best possible result for your project. The following list provides a description of aesthetic characteristics found on each of the following printed color pages for your reference. It is advisable to evaluate physical samples before making your final selection. Each Corian® Solid Surface sheet is ½" thick and 30"W x 144"L. Select colors come in ¼" thickness and/or wide sheet sizes, please check the color tool on www.corian.com for sizing details. For more information, visit www.corian.com or consult with your Corian® sales contact.

- * **Contains random veins:** veins may vary in intensity and highlight seams. Sample may not represent the full aesthetic.
- * **Linear veined, translucent:** veins may vary in intensity and highlight seams. Substrate shadowing may appear. Samples may not represent the full aesthetic.
- * **Translucent:** substrate shadowing may appear. Ideal for backlit applications.
- * **Contains reflective pigments:** may appear lighter or darker depending on viewing angle.
- * **Heavily pigmented:** may require additional maintenance.
- * **Contains large, randomly distributed particles:** sample may not represent the full aesthetic.
- * **Translucent, randomly veined:** veins may vary in intensity and highlight seams. Substrate shadowing may appear. Sample may not represent the full aesthetic.
- * **Heavily pigmented and veined:** veins may vary in intensity and highlight seams. May require additional maintenance. Sample may not represent the full aesthetic.
- * **Contains random veins and reflective pigments:** veins may vary in intensity and highlight seams. May appear lighter or darker depending on viewing angle. Sample may not represent the full aesthetic.
- * **Heavily pigmented with reflective pigments:** may appear lighter or darker depending on the viewing angle. May require additional maintenance.
- * **Heavily pigmented. Contains large, randomly distributed particles:** heavily pigmented. May require additional maintenance. Contains large, randomly distributed particles. Sample may not represent the full aesthetic.
- * **Heavily pigmented with random veins and reflective pigments:** veins may vary in intensity and highlight seams. May appear lighter or darker depending on the viewing angle. May require additional maintenance. Sample may not represent the full aesthetic.
- * **Heavily pigmented with random linear veins:** veins may vary in intensity and highlight seams. May require additional maintenance. Sample may not represent the full aesthetic.
- * **Contains random diagonal veins:** veins may vary in intensity and highlight seams. Sample may not represent the full aesthetic. Visit corian.com or ask your Corian® sales contact.
